Hi Gary,

Thanks for the HASP, that should help.

As far as the PA/SI schedule goes, we are planning to conduct the PA site visit next week, on September 18, and then we are planning to submit a complete draft PA to EPA Site Assessment sometime in November.

I've attached the PRP letters that we sent out and the mailing list. Our attorney sent these to Robert Werner last week. The list represents generators who sent their hazardous or class 1 nonhazardous waste to CES in 2009 and 2010. I have a database that gives specifics about the loads. Do you want that too?

I also gave our legal staff the heads up about the CES plans to do lab pack and take care of totes and drums.

Lastly, I just found out that the profile of the TCEQ ER stormwater (three frac tanks) was approved and we should hear about a hauling date soon.

Terry
